

COLORPOINT™

THIS CHANGES EVERYTHING...

CARD-MONROE CORP.
CREATING POSSIBILITIES...

THE TWO-COLOR (2C) COLORPOINT TUFTING MACHINE

CMC's 2C ColorPoint combines patented ColorPoint technology with the Infinity LCL tufting machine to produce fresh new looks and patterns in rugs, hospitality and residential carpets. Using just two yarn colors, this innovative machine fashions distinctive patterns in three or more hues, with 100% coverage, non-directional looks and no linear lines.

With 2C ColorPoint you can create designs in all cut-pile or a combination of cut & loop pile constructions with no buried ends. With the option of using the patented Infinity 2E yarn control system, the initial capital outlay can be less with the Two-Color machine. It is available in various gauges and can run traditional LCL products and new Two-Color styles giving you added flexibility.

INNOVATION, NOT IMITATION

The most significant tufting development in the past thirty years.

- Pattern capability previously only available from a loom
- 100% full gauge coverage with no buried ends
- Precise single penetration color placement
- Remarkable ease of design
- Unlimited variety of scale
- Non-directional looks for carpet tile or broadloom
- Produce unlimited patterns within the same color combinations
- Immediately alternate pattern colors without changing the creel setup
